

PRODUCT PORTFOLIO

CANOLA

Quantum[®] Pro  

A broad spectrum seed treatment containing fluquinconazole that suppresses blackleg in canola.

Select[®] Xtra 

A more powerful formulation of Select, one of Australia's most widely recognised grass herbicides. It offers the same reliable control of ryegrass and a wide range of other grass weeds and volunteer cereals - but in a high strength formulation.

Guardian[®]  

Protects canola seedlings from early season damage from aphids and mites.

Le-mat[®] 

A systemic insecticide controlling redlegged earth mite, blue oat mite and lucerne flea on oilseed crops for up to 6 weeks.

Clopyralid 

Controls a wide range of broadleaf weeds in canola and fallow land.

 Seed Treatment  Fungicide  Insecticide  Herbicide

Always read and follow label directions.
