

Quality - Strength - Reliability

**Select<sup>®</sup> Xtra is a more powerful formulation of Select - one of Australia's most widely recognised grass herbicides.**

**It offers the same reliable control of ryegrass and a wide range of other grass weeds and volunteer cereals in broadleaf crops including canola - but in a high strength formulation.**

**Handle less product and save on transport, handling and storage with Select Xtra.**

**Active ingredient: clethodim 360 g/L**

**Class: Group A Herbicide**

## BENEFITS

- Extra strength formulation - so you store & handle less product
- Rainfast within one hour of application
- Nil plant back period

**\*\*Always refer to the label for complete details\*\***

## GRASS WEED CONTROL IN CANOLA

### Mode of action

Clethodim is a member of the cyclohexadine group of herbicides. It acts by inhibiting acetyl-co-enzyme A carboxylase, meaning lipids are inhibited and therefore new plant cells are unable to be produced.

### Canola growth stage

DO NOT APPLY after flower buds become visible.

### Weeds controlled and weed growth stage:

- Annual rye grass (*Lolium rigidum*) - 2 leaf to fully tillered
- Annual phalaris (*Phalaris minor*) - 2 leaf to fully tillered
- Volunteer wheat (*Triticum aestivum*) - 2 leaf to fully tillered
- Volunteer oats (*Avena sativa*) - 2 leaf to fully tillered
- Volunteer barley (*Hordeum vulgare*) - 2 leaf to fully tillered
- Silver grass (*Vulpia bromoides*) - suppression only, 2 leaf to fully tillered
- Paradoxa grass (*Phalaris paradoxa*) - 2-5 leaf or 2 leaf to fully tillered (see rate range below)

100–330ml/ha	Annual rye grass ( <i>Lolium rigidum</i> ) Annual phalaris ( <i>Phalaris minor</i> )
150–330ml/ha (115-330ml/ ha WA only)	Barley grass ( <i>Hordeum leporinum</i> ) Brome grass ( <i>Bromus diandrus</i> )
330ml/ha	Volunteer barley ( <i>Hordeum vulgare</i> )
165ml–330ml/ha	Silver grass ( <i>Vulpia bomoides</i> ) - suppression only
165ml–330ml/ha	Paradoxa grass ( <i>Phalaris paradoxa</i> ) 165-250ml – 2-5 leaf stage 250-330ml – 2 leaf to fully tillered

### Adjuvants / Oils

Always apply with an oil or adjuvant:

- DC-Trate<sup>®</sup> at 2L/100L or
- Hasten<sup>®</sup> at 1L/100L or
- Kwickin at 1L/100L or
- Uptake<sup>®</sup> at 500ml/100L spray volume

### Compatibility

Select Xtra is compatible in canola with the following herbicides:

- Targa<sup>®</sup>
- Fusilade<sup>®</sup>
- Verdict<sup>™</sup>
- Sertin<sup>®</sup>

### Withholding periods

Harvest: not required when used as directed

Grazing: DO NOT graze or cut for stock food 21 days after application
